

Zoe Watson

Software Engineer

✉ Zwzwatts@gmail.com 🌐 linkedin.com/in/zma-watson 📄 github.com/ZoeWatson

A driven and innovative Software Engineer with 3+ years experience and a strong background in full-stack development, physics, and environmental science. Proficient in an array of object-oriented programming languages and with a strong foundation in Generative A.I. An enthusiastic team player, dedicated to improving processes, excels in data analysis and synthesis, and has a proven track record of success in delivering software solutions - including winning a Sony Innovation Award.

Work Experience

Harris Computer (CityView)

Full Stack Software Developer

01/2025- current
Victoria BC, Canada

- **Core Technologies:** C#, TypeScript, MySQL, Blazor, LLMs.
- Modernized legacy platforms with contemporary tech stacks, enhancing scalability and maintainability while preserving core functionality.
- Refactored code to improve readability, stability, and reduce technical debt.
- Spearheaded the redesign and relaunch of a core product dashboard—migrating from C# to TypeScript and Blazor—to resolve a major customer pain point and enhance the sales workflow. Enhancements include a modernized UI, modular widget architecture, and advanced data analysis features, delivering tangible value to clients

Sony Pictures Imageworks

Software Engineer

08/2022 - 05/2023
Vancouver BC, Canada

- **Core Technologies:** Electron (Node.js, JavaScript, HTML, CSS), Python.
- Independently built a secure internal media notebook app with over 50 features, 2 supported languages, and more than 300 internal users, in under 8 months.
- Self-taught Electron fast, moving from novice to first deliverable within 2 weeks.
- Lead user research, meeting with internal users across 5 departments, as well as 3 department heads.
- Coordinated learning sharing with my team and department, presenting a crash course in Electron to over 50 colleagues. Allowing the department to launch a number of new projects in Electron.

Motorola Solutions: Avigilon

Software Developer

09/2021 - 05/2022
Vancouver BC, Canada

- **Core Technologies :** Agile Methodologies, CI/CD Pipeline, C++/C#, JavaScript, Git.
- Developed and supported features for Avigilon Control Center (ACC), a software as a service ecosystem focused on investigative and situational awareness features for security cameras.
- Contributed to and (as a team) took ownership of multiple products and codebases. Working in C++ / C#, HTML / CSS / PHP, JavaScript, React, and Typescript, to build scalable enterprise software from visual design to unit tests
- Built, tested and deployed highly available and modular software products in a CI/CD pipeline.

Intellectus LLC

Information Technology Intern

05/2018 - 08/2020
Chantilly VA, United States

- **Core Technologies:** Security, Python, Web Programming (CSS, HTML, PHP).
- Designed a platform for digital on-boarding and pre-employment testing that facilitated the onboarding of over 200 new hires.
- Worked effectively during crunch time by communicating clearly, being flexible, anticipating needs and self-starting projects.
- Identified key requirements for software by communicating with non-technical stakeholders and translating their needs into technical requirements.

Technical Skills

Programming Languages

- **Object Oriented:** C, C#, C++, Java, Python, JavaScript (React, Node, Typescript, jQuery, AngularJS, Three JS, WebGL)
- **Web Development:** CSS, HTML, PHP, JSON
- **Databases:** MySQL, SQL, UML, XML
- **Frameworks:** Electron, Symphony, .Net, .NET Core, Blazor
- **Unix / Linux:** Shell, Bash, Git Bash
- **Generative A.I.:** Statistical Modeling, NPL, LLM, ML Learning, Deep Learning A.I. Regulations and Ethics.

Development Tools

- **Containerized Deployment:** Docker, Kubernetes
- **Version Control:** Git, GitHub, GitLab
- **Testing:** Automated Testing, User Experience Testing, Unit Tests
- **Cloud Computing:** Azure, Amazon Web Services

Workflows

- **Agile /Lean Methodologies:** Scrum, Code Reviews, Kanban
- **DevOps:** CI/CD, Infrastructure Automation, Site Reliability Engineering
- **Best Practices:** SOLID, GRASP, KISS, DRY, TDD, OODA loop

Education

BSc CMS: Computer Science, Physics, Environmental Science - May 2024

University Of British Columbia - Vancouver, BC

Achievements

Sony - Innovation Award - 2023

- Lead the redesign of a legacy tool in new software

Climate Change Model - Effective Community Action Model - 2023

- Designed, researched and programmed a user-friendly climate model in JavaScript and Electron.
- Wrote a scientific paper on the model and published in, The Expedition UBC, a peer reviewed journal.

Hobbies

Small Business Owner
